WORK_meet

Roels designs and produces products and furnishings under the 'work' brand for the office market that help end users address interior design issues. The timelessness of WORK_furniture means it's long-lasting and something as simple as new upholstery can give it a completely new look. WORK_meet provides the ability to have private conversations in open-plan spaces. WORK_meet can also be configured in a face-to-face design with a middle partition. The unit's acoustic values can also be adjusted to meet your needs.
