

## WORK\_layers\_CEILING

The horizontally suspended ceiling panels have been designed on a grid that corresponds to the dimensions of your furniture (just like all WORK\_layers products). That allows them to be combined with the vertically suspended panels and/or wall panels to create visual 'pathways' in the space. Of course, your furniture will also fit within the dimensions of these 'pathways'. Ceiling parts can be ordered with or without lighting, offering a lighting solution that requires no adjustments to the building.

### dimensions

width:	80 cm	100 cm	120 cm
depth:	80 cm	100 cm	120 cm
thickness:	5 cm		
radius:	5 cm		

### product specifications

design:	Basten Leijh
upholstery:	Fabric
foam:	PET
modular:	Yes

### details

The suspension system can be adjusted down to the millimeter.
